

# PSE – PHAGlobal® Plus

Action Tracking

“ We were most pleased with the attention to detail and completeness required to be in compliance with OSHA. ”

**The KEY to a stress-free, compliant PHA or DHA is in timely completion and success in completing action items identified.**

Process Safety Enterprise® – PHAGlobal® Plus automates this process for you - tracking action items across multiple sites reducing time manually spent on these tasks, increasing productivity instantly.

## Process Safety Enterprise® Features

- Efficient ability to track and share action items from PHAs/ DHAs
- Store all data, documents and workflows from many locations in one centralized system
- Single, scalable system that accommodates future needs
- Integrate legacy data easily

## PHAGlobal® Features

- PHA methodologies include: HAZOPs, LOPAs, FMEAs, What-If, and Checklist
- Auto-population, color coding and renumbering functionality
- Categorize action items and auto-generate tracking
- One-click concise reporting that can be shared easily

## Minimize Risk

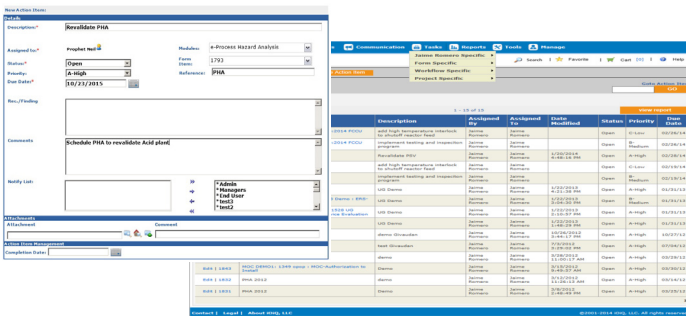

- Identify compliance gaps and track action items immediately
- Centralize data management

## Maximize Potential

- Share and collaborate with users across multiple facilities
- Improve productivity with action item tracking to simplify follow-ups and maintain compliance

“ We are unique as far as PHAs go and ioMosaic brings a lot of experience & technology to the table compared to any other vendors we have worked with. ”

PSE enables action items to be assigned and tracked to help maintain compliance. Action items from PHAGlobal® can be directly imported into PSE.

## FAQs

### ■ Who is the software bundle intended for?

PSO – PHAGlobal® is designed to help process safety professionals with the performance and record keeping of various PHAs, DHAs and other regulatory requirements. The ease of sharing action items and not merely tracking them makes a difference to our customers and reduces resources spent on cumbersome data organization and management.

### ■ Are there PHA templates included in PHAGlobal®?

Yes, built-in templates for popular methodologies such as HAZOP, What-If, and LOPA are included. Additional checklist templates are able to focus on specific needs like combustible dust, human factor, facility siting process issues, and more.

### ■ How much training is typically involved?

Minimal training is required because our software is Excel based and intuitive to use. PHAGlobal® uses standard Excel menus and keystrokes. Each study section is saved as a separate tab in an Excel workbook. You can also share data with other Windows applications and multiple users.

### ■ What are the licensing terms?

We offer flexible programs to fit your needs & budget. Please contact our sales team to learn more.

## Technical and Customer Support

We provide technical support by phone or online. Visit our online support center anytime:
