

## SmartPID™ Demo Software Download

### Introduction

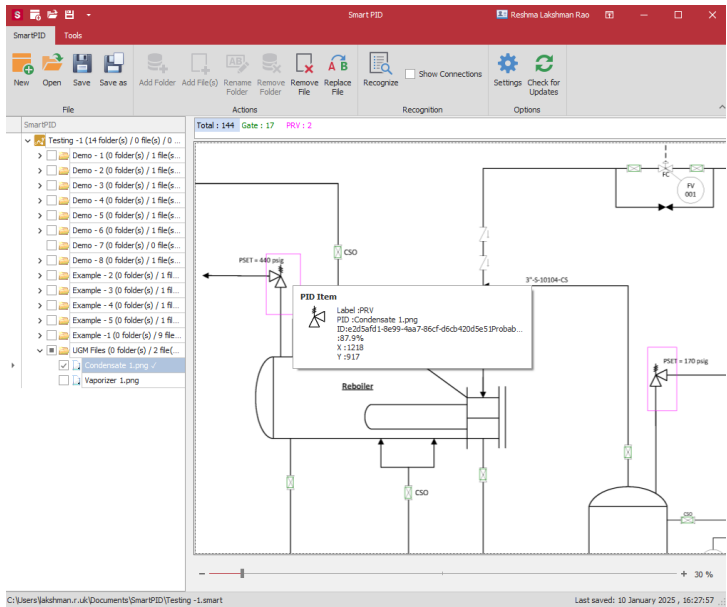

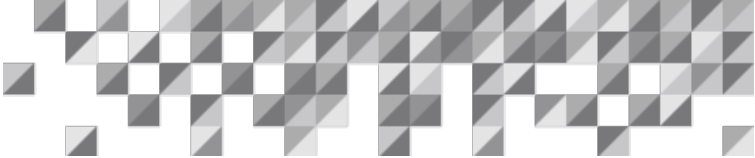

SmartPID™ was designed to help process safety and risk engineers with the fast, accurate identification of P&IDs and the automation of a variety of routine tasks in process safety evaluations, calculations, and design.

Export your results as a DEXPI-compliant file, which can then be further edited or imported into other software.

AI learns and improves as it is used. Have an unusual style of PRV on your P&ID? Once the information is pointed out to AI, it will learn and improve performance.

The user interface is modern and easy to use. Simply import the P&IDs, run the identification, and review the results.

### Pre-release Disclaimer

SmartPID™ is now in pre-release stage, undergoing development and testing and as such, the pre-release features may have errors or other operating deficiencies. The pre-release software is provided “AS IS”, “WITH ALL FAULTS”, AND WITHOUT ANY WARRANTIES, GUARANTEES, OR CONDITIONS OF ANY KIND. YOUR USE OF PRE-RELEASE SOFTWARE IS AT YOUR OWN RISK. Neither ioMosaic Corporation nor its suppliers will be liable for any damages whatsoever relating to your use of this pre-release software.

Users can contact ioMosaic Technical Support and report any issues to [ioiqhelpdesk@iomosaic.com](mailto:ioiqhelpdesk@iomosaic.com) or via an online support ticket at <https://support.ioMosaic.com/new-ticket> while testing the pre-release software. We will review all customer feedback and scenarios in order to plan a proper enhancement in the future official general release.

## For Process Safety Office® Users

This SmartPID™ Demo Software is valid for all active and registered users of any edition of SuperChems™ including DIERS Lite, DIERS, Expert and Enterprise editions, PSMPPro™, ioVu™, ioViper™, as well as our legacy software PHAGlobal®, ioAuditor™, and ioLogic™.

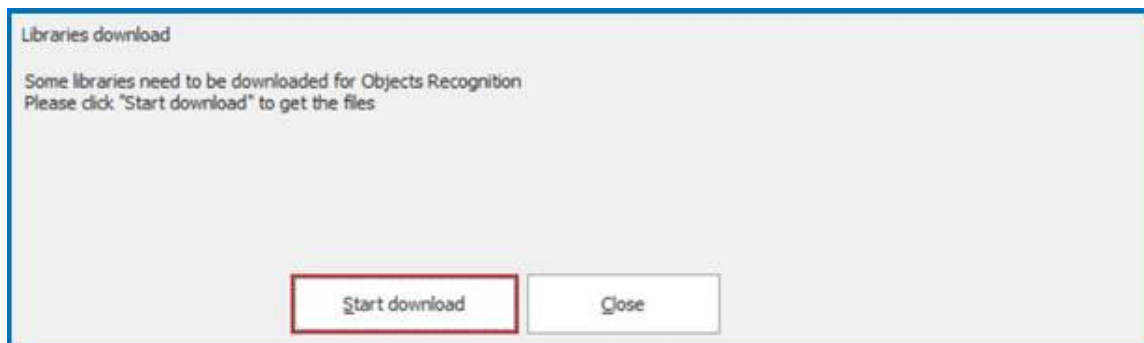

Your version of Process Safety Office® must be the latest version (v12.0). Please use the link below to update if required.

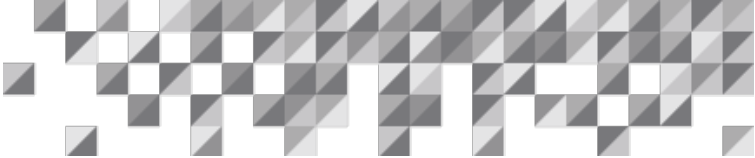

Shared File(s)		
Num	File Name	Expires On
